# **SENIOR PROJECT BUYER**

---

## **Tasks and responsibilities**

Under the responsibility of the Purchasing Manager, you will take the authority of the buying process in all new development projects, from project feasibility until the launch in production.

You will support the R&D Department, being part of the Project teams. You will have to find, evaluate and select suppliers taking into account the R&D needs, the LEM supplier qualification process and the LEM purchasing policy defined by the Purchasing team. Technology survey is part of your responsibility.

You will participate in the optimisation of the supplier panel in a Global Sourcing and Multi-Site vision. Within the framework of the projects, you will negotiate, establish and follow contracts, manage the launch of tools and prototypes, follow the parts qualification. You are therefore a key team player in the achievement of our three main operational objectives: quality improvement, cost reduction and “on time” delivery.

As highly motivated and dynamic professional, you play a key role in the new product developments. You are always ready to respond proactively to internal clients in a transversal dynamic.
