

Life Energy Motion

Directive 2000/53/EC – End-of life vehicles

Statement of compliance

Lem International SA is committed to providing products which are safe with respect to the environment and human health. In that regards, Lem International SA takes note of the European End-of life vehicles (ELV) directive 2000/53/EC which prohibit the following substances with the amount of the threshold limits listed below:

<u>Substances</u>	<u>Threshold limit</u>
Lead	0.1%
Mercury	0.1%
Hexavalent chromium	0.1%
Cadmium	0.01%

Lem International SA certify that to the best of our knowledge that the restricted substances are below the threshold limits and that all our products are in compliance with the regulation stated above.¹

Date issued: January 12, 2021

Raphael Surrel
Automotive Quality Manager

¹Lem International SA is not the producer of any of the materials contained in our products. This claim is based on safety datasheets (SDS) and materials declared in the International Material Data System (IMDS) provided by our raw material suppliers. Lem International SA accepts no responsibility for incomplete or inaccurate SDS or IMDS provided by suppliers. Lem international SA shall not be liable and shall not defend or indemnify any party should any material be out of compliance.
