

Ref: GO 10-SME, GO 20-SME

For the electronic measurement of current: DC, AC, pulsed..., with galvanic separation between the primary and the secondary circuit.

## Features

- Hall effect measuring principle
- Galvanic separation between primary and secondary circuit
- Insulated test voltage 2500 V RMS
- Low power consumption
- Extremely low profile
- Single power supply +5 V
- Fixed offset & sensitivity
- Response time 2  $\mu\text{s}$ .

## Advantages

- Small size and space saving
- High immunity to external interference
- High insulation capability
- Low electrical resistance (0.9 m $\Omega$ )
- No magnetic hysteresis
- Robust against external fields and cross-talk.

## Applications

- Small drives
- HVAC
- Appliances
- E-Bikes.

## Standards

- IEC 61800-5-1: 2007
- IEC 62109-1: 2010
- IEC 60950-1: 2005
- UL 1577: 2014.

## Application Domains

- Industrial.

### Absolute maximum ratings

| Parameter  | Symbol             | Unit | Min | Typ | Max  | Conditions                              |
|--|--------------------|------|-----|-----|------|---|
| Maximum supply voltage (not destructive)                           | $U_{C\ max}$       | V    |     |     | 8    |   |
| Maximum supply voltage (not entering non-standard modes)           |                    |      |     |     | 6.5  |   |
| Maximum overload capability  | $\hat{I}_{P\ max}$ | A    |     |     | ±200 | $T_A = 25\ ^\circ\text{C}$ , 1 ms pulse |
| Maximum electrostatic discharge voltage (HMB-Human Body Model)     | $U_{ESD\ HBM}$     | V    |     |     | 2000 | AEC-Q100-002 REV D                      |
| Maximum electrostatic discharge voltage (CDM-Charged Device Model) | $U_{ESD\ CDM}$     | V    |     |     | 500  | AEC-Q100-011 REV B                      |
| Maximum output current source                                      | $I_{out\ max}$     | mA   |     |     | 25   |   |
| Maximum output current sink  | $I_{out\ max}$     | mA   |     |     | 50   |   |
| Maximum junction temperature                                       | $T_{J\ max}$       | °C   |     |     | 150  |   |

### Insulation coordination

| Parameter   | Symbol      | Unit | Value                    | Comment   |

### UL 1577 Non Optical isolating devices - Component

File # E486776, Vol 1

Single protection, non-optical isolators, 2500 vac insulation

#### Standards

- UL 1577, Optical Isolators;
- CSA Component Acceptance Service Notice N°. 5 A, Component Acceptance Service for Optocouplers and Related Devices.

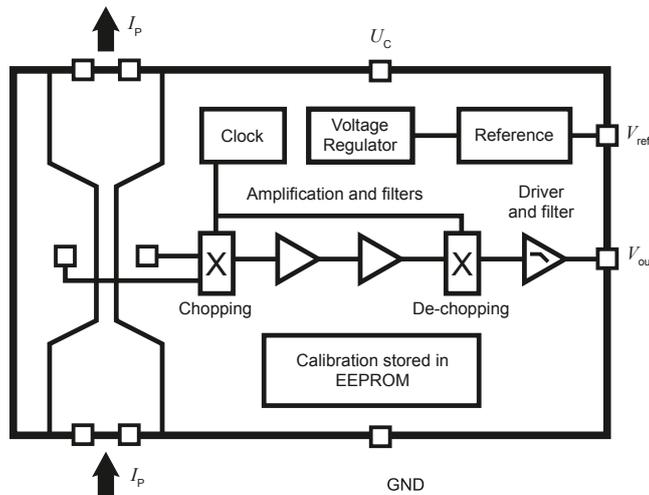

#### Marking

Only those products bearing the UL or UR Mark should be considered to be Listed or Recognized and covered under UL's Follow-Up Service. Always look for the Mark on the product.

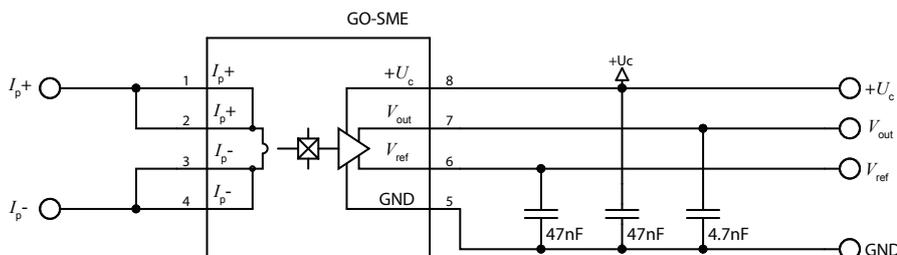

**Environmental and mechanical characteristics**

| Parameter  | Symbol            | Unit | Min | Typ | Max | Conditions            |

DETAIL "A"

SECTION A - A

- Notes:**
- 1) 10 Sprocket hole pitch cumulative tolerance  $\pm 0.2$  mm
  - 2) Camber in compliance with EIA 481
  - 3) Pocket position relative to sprocket hole measured as true position of pocket, not pocket hole.

**Soldering requirements**

MSL3, 260 °C - IPC/JEDEC J-STD-020
