## Current Transducer HAZ 4000 ．．．20000－SB

For the electronic measurement of currents：DC，AC，pulsed．．．，with galvanic separation between the primary circuit and the secondary circuit．

## Electrical data

| Primary nominal | Primary current <br> DC current |
| :--- | :--- |
| measuring range |  | or AC peak measuring range

$I_{\text {P }}(\mathrm{A})$
$I_{\text {PM }}(\mathrm{A})$

| General data |  |  |  |
| :---: | :---: | :---: | :---: |
| $T_{\text {A }}$ | Ambient operating temperature | －25 ．．．＋85 | ${ }^{\circ} \mathrm{C}$ |
| $T_{\text {Ast }}$ | Ambient storage temperature | $-30 \ldots+90$ | ${ }^{\circ} \mathrm{C}$ |
| RH | Relative humidity（non－condensing）${ }^{4)}$ | $\leq 95$ | \％ |
|  | Altitude above sea level | 2000 | m |
|  |  | Indoor use |  |
| $m$ | Mass approx． | 6 | kg |
|  |  |  |  |
| Notes： | ${ }^{1)}$ Linearity data exclude the electrical offset；${ }^{2)}$ For a $\mathrm{d} i / \mathrm{d} t=50 \mathrm{~A} / \mu \mathrm{s} ;{ }^{3)}$ To avoid excessive core heating；${ }^{4)}$ Long term exposure to high humidity environment may affect to product reliability； <br> ${ }^{5)}$ Please consult characterisation report for more technical details and application advice； <br> ${ }^{6)}$ Deviation of the offset during the test IEC 61000－4－3＠ $20 \mathrm{~V} / \mathrm{m}$ between 100 and 220 MHz and between 450 and 550 MHz ． |  |  |

## Current Transducer HAZ 4000 ．．．20000－SB

| Insulation coordination |  |  |  |
| :--- | :--- | :--- | :--- |
| $U_{\mathrm{d}}$ | RMS voltage for AC insulation test， $50 \mathrm{~Hz}, 1 \mathrm{~min}$ | 17 | kV |
| $U_{\mathrm{t}}$ | Partial discharge extinction RMS voltage $\left(q_{\mathrm{m}}<10 \mathrm{pC}\right)$ | 3.75 | kV |
| $U_{\mathrm{Ni}}$ | Impulse withstand voltage 1．2／50 $\mu \mathrm{s}^{1)}$ | 32 | kV |
|  |  | Min |  |
| $d_{\mathrm{Cp}}$ | Creepage distance | $>45$ | mm |
| $d_{\mathrm{Cl}}$ | Clearance | $>45$ | mm |
| $C T I$ | Comparative Tracking Index（group I） | $>600$ |  |

Note：${ }^{1)}$ Impulse withstand voltage $1.2 / 50 \mu \mathrm{~s}$ passed without correction factors of 2000 m altitude．

## Applications examples

According to EN 50178 and IEC 61010－1 standards and following conditions：

|  | EN 50178 | IEC 61010－1 |
| :--- | :---: | :---: |
| $d_{\mathrm{C}_{\mathrm{p}}}, d_{\mathrm{C} 1}, U_{\mathrm{Ni}}$ | Rated insulation voltage | Nominal voltage |
| Basic insulation | 8000 V | 9000 V |
| Reinforced insulation | 3000 V | 4000 V |

－Over voltage category OV 3
－Pollution degree PD2
－Non－uniform field

## Safety

This transducer must be used in limited－energy secondary circuits according to IEC 61010－1．

This transducer must be used in electric／electronic equipment with respect to applicable standards and safety requirements in accordance with the manufacturer＇s operating instructions．

Caution，risk of electrical shock
When operating the transducer，certain parts of the module can carry hazardous voltage（eg．primary busbar，power supply）．Ignoring this warning can lead to injury and／or cause serious damage．
This transducer is a build－in device，whose conducting parts must be inaccessible after installation．A protective housing or additional shield could be used．
Main supply must be able to be disconnected．
14July2023／Version 14 LEM reserves the right to carry out modifications on its transducers，

Dimensions HAZ 4000 ．．．2000－SB（in mm）

## Mechanical characteristics

－General tolerance
－Aperture for primary conductor
$\pm 0.5 \mathrm{~mm}$
$162 \mathrm{~mm} \times 42 \mathrm{~mm}$
（ $\pm 2 \mathrm{~mm}$ ）
$4 \times$ M5
（not supplied）
Recommended fastening torque
－Connection to secondary
$<5 \mathrm{~N} \cdot \mathrm{~m}$
FUJICON F2322AZ
（6 terminals）

## Remarks

－$U_{\text {out }}$ is positive when $I_{\mathrm{p}}$ flows in the direction of the arrow．
－Temperature of the primary conductor should not exceed $120^{\circ} \mathrm{C}$ ．
－Installation of the transducer must be done unless otherwise specified on the datasheet，according to LEM Transducer Generic Mounting Rules．Please refer to LEM document N ${ }^{\circ}$ ANE120504 available on our Web site： https：／／www．lem．com／en／file／3137／download
－This is a standard model．For different versions（supply voltages，turns ratios，unidirectional measurements．．．）， please contact us．
